Welcome To Our Clinic!

Maple Valley Pediatric Therapy welcomes you and your family. We offer outpatient occupational therapy services to both children and adults. We provide fun and challenging therapeutic activities in a caring environment.

Your child's first visit will be a 60 minute evaluation that includes: conducting child/parent interviews, clinical observations, and administration of standardized testing. Your insurance company is billed \$600.00 for this initial evaluation. This total amount covers the amount of time it takes for our therapist to evaluate your child, write up the findings and create a comprehensive individualized plan of care. Ongoing 60 minute sessions will be scheduled based on the recommendation of the evaluating therapist and will be billed to your insurance at \$150 per hour a visit.

Important things to know:

- For continuity of care we request that you bring any prior evaluations and any other applicable reports, such as IEP's, to your first appointment.
- You are advised to contact your insurance company directly to verify occupational therapy coverage **before** scheduling an evaluation, as **you are responsible for all charges accrued**.
- For your convenience, we are happy to provide billing for most insurance companies at no additional cost. While we will contact your insurance to inquire about your benefits, **the information that we provide to you is not a guarantee of coverage**.
- **Please note, appointments must be cancelled at least 24 hours in advance or a \$50 fee will be billed to you.** Missed appointments cannot be billed to insurance and are the responsibility of the patient. We understand that situations may occur that are beyond your control. Please contact us if your child has a fever or flu-like symptoms or if an emergency situation arises. In those situations we will waive the fee and make every attempt to reschedule.

Thank you for the opportunity to work with you and your family member. Please feel free to contact us if you have any questions or need any further information.

Sincerely,

The Team at Maple Valley Pediatric Therapy
